

Water Audit Scavenger Hunt

TOILETS

- If your toilet is a single flush, circle a water drop
- If your toilet leaks, circle a sad face
- If your toilet **doesn't** leak, circle a happy face

1.				6.			
2.				7.			
3.				8.			
4.				9.			
5.				10.			

SINKS

- If your sink leaks, circle a sad face
- If your sink **doesn't** leak, circle a happy face

1.			6.		
2.			7.		
3.					
4.					
5.					

BUBBLER

- If your bubbler leaks, circle a sad face
- If your bubbler **doesn't** leak, circle a happy face

1.			
2.			
3.			
4.			
5.			

WASHING MACHINE

- Colour in how many stars your washing machine shows

Water Audit Scavenger Hunt

OUTDOOR TAPS

- If your tap leaks, circle a sad face
- If your tap **doesn't** leak, circle a happy face

1.			6.		
2.			7.		
3.			8.		
4.			9.		
5.			10.		

RAINWATER TANK

- If your centre **doesn't** have a rainwater tank, circle the sad face
- If your centre has a rainwater tank, circle the happy face

HOSE

- If your hose **doesn't** have a trigger nozzle, circle the sad face
- If your hose has a trigger nozzle, circle the happy face

WATER METER

- If you **can't** find your water meter, circle the sad face
- If you can find your water meter, circle the happy face

WATER REFILL STATION

- If you **can't** find a water bottle refill station, circle a sad face
- If you can find a water bottle station, circle the happy face

Water Audit Scavenger Hunt Review

SAD & HAPPY FACE TALLY

- Tally all the happy and sad faces circled during the audit and write the the number in the appropriate box
- Add together all the happy and sad faces and put the total in the last box
- Having more than 80% happy faces circled is a good benchmark

=

=

Total Faces circled =

WATER DROPS TALLY

- Tally all the water drops circled which represent single flush toilets
- A single flush toilet can waste twice as much water as a dual flush
- Having zero water drops is excellent, but if you have any water drops tallied your centre may want to look at the water efficiency of your toilets

=

TAKING ACTION

The Water Audit Scavenger Hunt is an activity to promote water literacy among educators and children. During this activity your center may find areas of water inefficiency. Here are some ideas to consider after completing the scavenger hunt to gain the most benefit from this activity.

- Provide the Centre Director with:
 - Leaks that have been detected
 - List of water inefficient devices found
 - List of areas where your Centre's water efficiency is doing well
- Put up signs to remind staff to fully fill washing machines to reduce water wastage
- Teach children how to report water leaks to educators

STAR TALLY

- Tally your stars in the box below
- The stars represent water efficiency rating; the more stars the more water efficient
- Most washing machines will have a maximum of 6 stars for efficiency

=

One leaky toilet can waste 60 litres a day
